Matterport is Building the World's Largest Digital Library of Spatial Data

- Eliminated the need to hire one additional full-time employee to manage accounts payable
- Accelerated the monthly close process by 40%
- Implemented automated three-way PO matching to control spend

A groundbreaking spatial computing platform, Matterport turns buildings into data by making every space more valuable and accessible. Millions of buildings worldwide have been transformed into immersive digital twins to improve every part of the building lifecycle, from planning, construction, and operations to documentation, appraisal, and marketing.

Bridging the Physical and Digital

With a focus on digitization, Matterport takes buildings online so customers can more efficiently design, build, promote, and manage their most valuable assets from any device. From homes and offices to factories and hotels, Matterport's market-leading platform is delivering unparalleled property insights and analysis with immersive 3D technology.

> You buy a house, you rent places, you will see Matterport products. Our scanned services enable you to visualize big and small.

Driving Results

To create digital twins, Matterport relied on hundreds of independent technicians to scan properties. As a result, they received thousands of invoices via email. To keep up with demand, the accounting team was manually entering information into their ERP, NetSuite, which would inconsistently sync to Matterport's bank. As they scaled globally, this highly manual process was proving to be a significant hindrance to growth.

- Automate PO Matching
- Manage Currency Conversions
- Streamline Global Payouts
- Better Integrate with ERP, NetSuite

Realizing Unforeseen Efficiencies

As Matterport's network grew, so did the need to streamline their finance workflow. Manual work delayed payments and increased errors—straining relationships with both suppliers and internal employees. Matterport knew they needed to find a finance automation solution to support daily operations and increase efficiency.

> [Tipalti] eliminated the manual work that was consuming all of us—that's a huge improvement. Another big uplevel is payments. Now it's click, fund, we're done.

Solutions Made for You

With Tipalti, invoices are now automatically imported and immediately turned into bills, with amounts preapproved by Matterport's sales operations team. Plus, supplier relationships have greatly improved with self-service onboarding that has eliminated manual data entry and increased accuracy—which their auditors love.

- Eliminated Duplicate Accruals
- Added the Ability to Fund Multiple Currencies
- Deployed Thousands of Payments Monthly
- Improved Reconciliation with ERP, NetSuite

Capture on Your Terms

With Tipalti's advanced automation capabilities, the accounts payable process has become much more productive and efficient, which has saved Matterport's accounting team both time and manpower.
> Before Tipalti, I often stepped in to help the accounting team at the transaction level because the volumes were too big. Now, I don't need to—Tipalti can handle the volume from now on.
